1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 66, 68, 69-102 rejected under 35 U.S.C. 102(b) as being anticipated by Maruyama et al (5,580,658).

Maruyama et al discloses the claimed carbon structure filled with a metal such as copper, and the claimed additives. The claimed coefficients are considered inherent. Applicant's arguments filed 2-26-03 have been fully considered but they are not persuasive. The applicant argues that the examiner has not proven the inherency. It is the examiner's position that since the composite is made of the same claimed components that coefficients are inherent. The applicant is reminded that it is elementary that the mere recitation of a newly discovered function or property, inherently possessed by things in the prior art, does not cause a claim drawn to distinguish over the prior art. Additionally, where the Patent Office has reason to believe that the functional limitation asserted to be critical for establish novelty in the claimed subject matter may, in fact, be an inherent characteristic of the prior art, it possesses the authority to require the applicant to prove that the subject matter shown to be in the prior art does not possess the characteristic relied on. (*In re Swinehart*, 169 USPQ 226 (CCPA 1971)).

3. Claims 66-87, 89-103 are rejected under 35 U.S.C. 102(b) as being anticipated by BF Goodrich Co (EP 0 673 900).

BF Goodrich discloses the claimed carbon metal composite with the claimed conductivity and thermal expansion, with the claimed additives.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 88 is rejected under 35 U.S.C. 103(a) as being unpatentable over Maruyama et al (5,580,658) or BF Goodrich (EP 0 673 900) in view of Osaka Gas Co Ltd (JP 10-168502).

Maruyama et al or BF Goodrich discloses the claimed invention except for the claimed zinc additive. Osaka Gas Co Ltd discloses zinc as a additive for a metal carbon composite. Thus it would have been to one of ordinary skill in the art to include zinc in Maruyama et al or BF Goodrich, as zinc is known in the metal carbon composite art to improve performance.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1775

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
